

Phase 1: Focus on home and visualization pages. Consider combining home and feature pages. User profile: no profile will just show a broad visual w/ filters. With profile: saves user's chosen filters either automatically or manually, saves changes to API. When user returns, the website retrieves the API and redirects user to last known location on the visual. "Workspace."

Phase 1 pt2:
see CV for
API website
resource.

Phase 2: Support, help, about, newsletter, and contact pages. Consider omitting or combining pages.
